João Pargana

■

Full Stack Developer

Phone	+351 928154583	**Email**	jmpargana@gmail.com

01 PROFILE

João Pargana is both artist and scientist. His broad range of interests and skills manifest in his work as a web developer. Sensibility in the aesthetics of design and precision in the engineering of reliable tools, combine in a highly communicative UI experience.

02 EMPLOYMENT HISTORY

01/2022

Software Developer at Goodright GmbH
Hannover

Working as a Full-Stack developer for the Startup Pflegewächter in the health insurance field.

Developing and maintaining a techstack written in ReactJS/Typescript with Kotlin/Quarkus/MongoDB, deployed in AWS.

01/2021 — 01/2022

Software Consultant at Link Consulting
Lisbon

Worked as a Full-stack developer for two major projects.

1. Implementation of OCPI protocol in all versions for the PRIO electric mobility group. Used a microservice architecture written in nodejs/express/mongodb servers deployed in kubernetes, with Solace as a messaging API.

2. Creation of a UI library in Vue/SASS for Salvador Caetano Group, to be used in their DigitalStore brand. Library is currently being used in the Hyundai and Carplus webapps.

10/2020 — 10/2021

Freelancer Mobile Developer at Max-Planck-Institute for empirical Aesthetics
Frankfurt am Main

Developed two versions of a research app to measure heartbeats in the ArtLab department. Both in Swift for WatchOS as in Kotlin for Android.
